This practice is advised for both rear and front panniers. **CAUTION:** The maximum weight capacity of every carrier model is different. Please observe the maximum weight allowance of the carrier fitted to your bicycle. Note: Sometimes the maximum capacity of the panniers fixing system can exceed the maximum capacity of the carrier. **DO NOT** exceed the maximum capacity of the carrier! Note, that the use of panniers will significantly influence the handling properties of your bicycle.

**Attention:** As abrasion cannot be ruled out, we recommend that all points where the mounting system contacts the bicycle rack or frame be protected by scratch protection film.

**Note:** In order to meet standard IP64 (6=dustproof 4=protected against splash water coming from all directions) the closure must be rolled 3-4 times.
