DUFFLE ZIP

K1481

Care Instructions:

- Do not use solvents or aggressive cleaning agents
- Wipe clean with a damp cloth or clean with warm water and a mild soap solution. Remove heavier soiling carefully using a soft brush and gall soap.
- Allow the bag to dry completely before storage.
- Clean using bicycle cleaner, warm water, and a cloth, sponge, or soft brush.
- To achieve protection class IP67 (6 = dust-tight, 7 = protected against temporary immersion up to 1 m for 30 minutes), the zipper must be fully closed.
- Keep free of coarse dirt.
- Take care not to fold or crush the zippers, as this may impair their function.
- Keep clean and clean in the same way as the fabric, as dirt particles—especially between the zipper teeth—can accumulate and impair the sealing lip's function and the zipper's waterproof performance.
- Proper lubrication before use is essential for reliable operation.
- Do not store the bag rolled up or folded, as this may cause the coating to crack.
- For maintenance, use the original TIZIP® lubricant or a comparable product and follow the manufacturer's instructions.
- Store protected from UV radiation to prevent the material from fading.
- Reproofing is not necessary. The fabrics have a waterproof coating and therefore do not require any additional chemical treatment.
