

ORTLIEB PANNIER MOUNTING SYSTEM QUICK-LOCK1 (QL1)

MOUNTING SYSTEM FOR BIKE PANNIERS

The bike pannier mounting system QL1 allows mounting and removing pannier to and from the rack with one hand only. The hooks are automatically locked and opened by lifting the handle.

The patented ORTLIEB QL1 is suitable for racks with a tube diameters up to 16 mm. Hook inserts for diameters of 8 and 11 mm are included in addition to the 16 mm hook, so in case the diameter needs to be reduced the inserts can easily be applied. These spacers allow fitting the bag perfectly to all common rack diameters.

Both upper QL1 hooks can be adjusted on the hook rail. The semi-elliptical hook rail on the lower rear side of the pannier serves for additional fixation and prevents the bag from moving around. Thanks to the mounting hook rotatable in 15° steps the system is compatible with almost any bike rack.

All bike pannier models of the city line feature the QL1 system.
